

# Construction update

## Chandos Street Noise Wall

### The Chandos Street Noise Wall will help reduce traffic noise for nearby residents between St Thomas' Rest Park and Brook Street, Crows Nest.

Work to build the noise wall is progressing well and we have now finished most of our major construction activities. We would like to thank you for your patience.

Currently infrastructure construction projects are considered essential to the economy and will continue as planned across the city and the state.

The safety and wellbeing of our workforce and the wider community is our highest priority. Our people are following hygiene practices and appropriate physical distancing measures during the Coronavirus outbreak and are complying with current health advice at all times.

#### What work will be carried out?

We are now completing the remaining work to finish the wall which includes installing panels, painting, landscaping and demobilising work areas. We expect the noise wall to be completed by mid July.

From mid June we will carry out night work to reinstate our construction site along the Warringah Freeway. This work will be done at night to avoid impacts to traffic during the day. The work will take up to five nights to complete and includes removing barriers, fencing, site sheds, equipment and machinery and line marking.

#### Our work schedule

**Between Sunday 14 June and Sunday 5 July**, we will carry out up to five night shifts, weather permitting. We will continue to work during the day until the noise wall is complete.

We will carry out our work between:

- **7am and 6pm Monday to Friday**
- **8am and 1pm Saturdays**
- **8pm and 5am Sunday to Friday.**

No work will be carried out on public holidays.

#### How will our work affect you?

Some of our work may be noisy at times. We will make every effort to minimise impacts to residents during night work, including finishing the noisiest activities by midnight.

We will always ensure you have access to your property while we carry out our work, although there may be a minor delay while we move vehicles and machinery out of the way to make access around the area safe. This may impact how you move around your area and we thank you for your understanding.
