

F6 Extension Stage 1 – air quality monitoring

The NSW Government is progressing with the development of the F6 Extension Stage 1 between the New M5, Arncliffe and President Avenue, Kogarah.

Roads and Maritime Services is planning to carry out air quality monitoring to gather information about road side air quality conditions within the project area. Our air quality advisers have selected a site on the corner of General Holmes Drive and Tancred Avenue, Kyeemagh. We have included a map to show the location of the monitoring station.

Work to install the monitoring station is expected to start from 20 November 2017 and will take around six weeks to complete, weather permitting.

The work will take place between **7am** and **6pm Monday to Friday** and between **8am** and **1pm on Saturday**. There will be no work at night or on Sundays.

Once installed, the station will operate at this location 24 hours per day, seven days per week for up to 12 months, to record and establish baseline air quality data.

What will the monitoring station look and sound like?

The monitoring station will be placed on a concrete pad about 6x7 metres and have security fencing around it. The monitoring station itself will be about 4x2.5 metres, and 2.5 metres high with a 10 metre high metal mast. We have included an image of an existing air quality monitoring station.

The monitoring station will meet strict operational guidelines. Noise is expected to be less than average local traffic.

Personnel will visit the station about twice a month between **7am** and **6pm Monday to Friday** for testing and calibration of the equipment.

The location of the air quality monitoring equipment does not indicate a possible alignment for the project. It is to record data on present day air quality.

How will the air quality information be used?

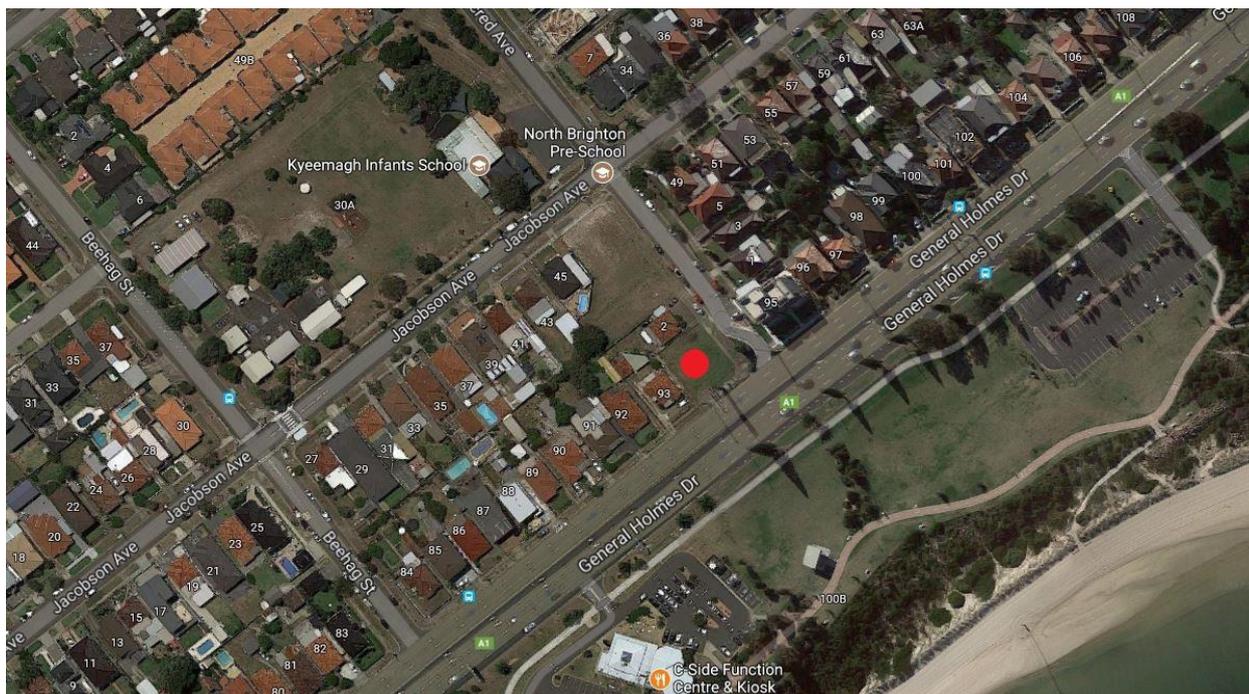

Air quality is an important component of any future environmental assessment for a project. Air quality information collected would be included as part of any future environmental impact statement prepared for the project, which is made publicly available.

Contact

If you have any questions, please contact our project team on 1800 789 297 during office hours (8.30am to 5pm Monday to Friday) or F6Extension@rms.nsw.gov.au

Thank you for your patience during this important work.
