Continuing night work on Hoxton Park Road and Joadja Road, Hoxton Park from Tuesday 31 March

The NSW Government is upgrading the Hoxton Park Road and Joadja Road intersection at Hoxton Park to ease congestion, reduce travel times and improve safety.

Work continuing - March to June
This project is progressing well, with completion expected for mid-2020.

So far we have:
- started excavation and drainage work
- started road surface construction and concrete work
- relocated streetlights.

Our next stage of work will include:
- relocating traffic lights
- continuing excavation and drainage work
- continuing road surface construction and concrete work
- asphalting, including temporary out of hours road closures and detours.

We will keep you up to date with further information, including any proposed road closures and detours, as the work progresses.
How will the work affect you?

There may be some noise and disruption associated with this work including asphalting, jackhammering, concrete cutting and excavating. We will make every effort to minimise noise and disruption by completing noisier tasks before midnight and using noise blankets where possible.

Residential access will be maintained. There will be no disruption to local bus timetables.

Asbestos monitoring

Asbestos may be discovered in the ground in the project area as the project progresses. If we identify asbestos, we will implement an asbestos management plan which details safe work practices and will ensure all work is managed to strict Environment Protection Authority requirements.

Traffic changes

To ensure the work zone is safe, lane closures, road closures and detours will be in place and may affect travel times.

Clearly marked detours and traffic controllers will be in place to help road users complete their journeys. For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.
