

Table of contents

Declarations.....	vii
Document control.....	viii
Report definitions.....	ix
1. Contextual information	1
1.1 Background information.....	1
1.2 The proposal	6
1.3 Alternatives considered	11
1.4 Subject site and study area	11
1.5 Land tenure.....	14
2. Initial assessment.....	15
2.1 Subject species, population and ecological communities as listed in DGR's.....	15
2.2 Study area general description	19
3. Survey	26
3.1 Specific survey requirements.....	26
3.2 Survey method and effort	30
3.3 Survey timing	41
4. Survey results	44
4.1 Flora and vegetation types	44
4.2 Birds	46
4.3 Mammals	48
4.4 Threatened species, populations and ecological communities recorded.....	48
5. Refined subject species – species likely to be affected	53
5.1 Species likely to be affected	53
5.2 Subject species excluded from further assessment.....	54
5.3 Conservation status of affected species.....	61
5.4 Habitats in the study area.....	64
5.5 Abundance and distribution of affected species and habitats in study area.....	66
5.6 Abundance and distribution of affected species and habitats in locality and region.....	75
6. Impact assessment – species, populations and ecological communities	88
6.1 Direct impacts	88
6.2 Indirect impacts.....	99
7. Impact amelioration.....	103
7.1 Short and long term management strategies.....	103
8. Significance assessment.....	120
9. Additional information.....	122
9.1 Qualifications and experience.....	122

9.2	Other approvals required.....	122
9.3	Licences.....	123
9.4	Disclaimer	123
9.5	Assumptions.....	123
10.	References	124

Table index

Table 1 - Compliance table showing where sections of the DGR's are addressed in the SIS.....	1
Table 2 - Zoning and relevant areas in the subject site and study area for the proposal.	14
Table 3 - Subject species, populations and ecological communities listed in the DGRs issued by OEH.	16
Table 4 - Threatened species, populations and ecological communities known and/or likely to occur in the study area.	18
Table 5 - Vegetation communities present within the subject site, and corresponding NSW plant community type (PCT)	22
Table 6 - Modifications of DGR survey requirements agreed with OEH.....	27
Table 7 - Survey method and effort for subject species, population and ecological communities.....	35
Table 8 - Weather conditions during survey periods for fauna survey groups	41
Table 9 - TSC Act listed threatened species, populations and ecological communities recorded in the study area during targeted surveys.....	48
Table 10 - Plant community types and areas in the study area.....	50
Table 11 - Subject species likely to be affected by the proposal for discussion in section 5.3 to 5.6.....	53
Table 12 - Subject species excluded from further assessment based on results of surveys.....	60
Table 13 - Plot variables for groundcover attributes in the study area	66
Table 14 - Box-Gum Woodland in the subject site, study area and locality.....	67
Table 15 - Box-Gum Woodland patches in the locality and their corresponding PCT ID.	76
Table 16 - Hollow-bearing trees and hollows in the subject site, study area and locality	80
Table 17 - Size and numbers of hollows in the study area and locality	80
Table 18 - Hollow dependent subject species and the potential number of suitable hollows available in the study area and representative number in the locality.....	81
Table 19 - Summary of clearing impacts on affected subject species.....	86
Table 20 - Vegetation types in the subject site that would be removed by the proposal.	88
Table 21 - Vegetation to be removed and component areas within the E2 biocertified zone and Planning Agreement Areas.	89
Table 22 - Box-Gum Woodland in the subject site, study area and locality.....	89
Table 23 - Hollow-bearing trees to be removed by the proposal.....	91

Table 24 - Size and numbers of hollows in the study area and locality	94
Table 25 - Additional subject species specific threats	101
Table 26 - Ecological safeguards and mitigation measures to be implemented for the proposal	107
Table 27 - Area required to offset biodiversity impacts of the development.	113
Table 28 - Vegetation zones and condition identified in the proposed biodiversity offset site for the development.....	114
Table 29 - Comparison between development site and offset site recorded and predicted threatened species.	116
Table 30 - Summary of NSW assessment of significance for relevant subject species, population and ecological communities in the DGR's.	120
Table 31 - Key personnel and their role in writing the report.....	122
Table 32 - Key personnel and their specialist area.....	122
Table 33 - Required licences for specialist studies.....	123

Figure index

Figure 1 – Topographic map of locality	4
Figure 2 – Aerial photograph of locality.....	5
Figure 3 – The proposal	9
Figure 4 – Proposed relocation of utilities	10
Figure 5 – Subject site and study area.....	13
Figure 6 – Squirrel Glider, bat, hollow-bearing tree and flora survey locations in the locality.....	38
Figure 7 – Squirrel Glider, bat and flora survey locations in the study area.....	39
Figure 8 – Winter and spring bird survey locations in the study area.	40
Figure 9 – Vegetation communities in the study area.....	45
Figure 10 – Potential nest tree locations Glossy Black Cockatoo, Barking Owl and Little Eagle.....	47
Figure 11 – Threatened species recorded in the study area.	51
Figure 12 – Threatened species recorded in the locality.	52
Figure 13 – Superb Parrot flight patches and potential nest trees in the study area.....	70
Figure 14 – Ground-truthed Box-Gum Woodland vegetation mapping in the locality.	79
Figure 15 – Vegetation communities to be removed.	90
Figure 16 - Hollow-bearing trees in the study area and hollow-bearing trees to be removed.....	92
Figure 17 – Squirrel Glider recaptures in the study area illustrating movement over linear infrastructure.	98
Figure 18 – Vegetation zones at the proposed offset site.....	115

Appendices

- Appendix A – Director-General’s Requirements
- Appendix B – Subject species habitat requirements
- Appendix C – Likelihood of occurrence table
- Appendix D – Assessments of significance
- Appendix E – Flora species lists
- Appendix F – Hollow-bearing tree data
- Appendix G – Data sheets
- Appendix H – Meeting minutes with OEH
- Appendix I – Specialist bird report (winter)
- Appendix J – Specialist bird report (spring)
- Appendix K – Specialist microbat report
- Appendix L – Specialist Squirrel Glider report
- Appendix M – Specialist Box-Gum Woodland report
- Appendix N – Offset site report
- Appendix O – Commonwealth preliminary documentation
