Lansdowne Bridge replacement, Goulburn

Project update – December 2018

Image showing piling work for the new Lansdowne Bridge in progress.

Significant progress has been made on the replacement of Lansdowne Bridge and upgraded road approaches, with the project on track for completion mid-2019.

What has happened to date?

The contract for construction was awarded to Abergeldie contractors in July.

Progress includes:

- Installation of site fencing and traffic barriers
- Major earthworks are nearing completion on Bungonia Road
- Construction of temporary work platforms, including across Mulwaree River
- Piling works for the new bridge supports.

What is happening in the next three months?

- Construction of the bridge piers, retaining walls and abutments
- Earthworks will continue at the Forbes Street intersection, including installing new stormwater pipes
- Offsite manufacturing of the new bridge girders, with delivery expected in early 2019.
Traffic impacts

- Lane closures and traffic control may be in place on Bungonia Road and Forbes Street
- A 40 km/h speed limit is in place through the work site at all times
- Working hours are Monday to Friday between 7am and 5pm, and some Saturdays between 8am and 1pm.

Work over the holiday period

- Work will cease for the holidays between Friday 21 December 2018 and Sunday 6 January 2019
- Regular inspections and security monitoring of the work site will be undertaken during the holiday period to ensure ongoing safety for road users and the community.
