

Early works at Mona Vale Road between Kimbriki Road and Tumburra Street, Ingleside from Monday 29 April

The NSW Government is investing \$140 million to upgrade Mona Vale Road between Manor Road, Ingleside, and Foley Street, Mona Vale, from two to four lanes to improve safety and traffic efficiency.

As mentioned in our January update, some of the excess soil and rock from the Mona Vale Road East construction site will be reused at the Mona Vale Road West site. The excess material will be used to build an embankment in readiness for the future widening work on the Mona Vale Road West project.

The two projects have been designed to ensure a minimum amount of material is removed from the projects combined. This will reduce the number of truck movements along the corridor, overall cost for both projects, and reduce our carbon footprint. The work will cover area on the northern side of Mona Vale Road, between Kimbriki Road and Tumburra Street, Ingleside.

Note: Shaded areas are approximations for general information and illustrative purposes only.

Our work program

Work will include installing erosion and sedimentation controls, removing vegetation, relocating services and building an embankment for the future road alignment.

Surveying the area, setting out the work zone and installing signage is being undertaken.

From **Monday 29 April** we will begin clearing vegetation and establishing the site's foundations. This work should be completed by the end of May, 2019. Utilities relocations will then take place from mid-2019. The area will be used to stockpile the extra soil and rock later in 2019. Our work hours will be **7am to 6pm** from **Monday to Friday** and **8am to 1pm** on **Saturdays**. There will also be up to three nightshifts (Monday, Tuesday and Thursday) each week from **9pm to 5am**.

How will the work affect you?

There will be noise and dust as vegetation is removed and fencing is installed. There will be changed traffic conditions during the day and at night with temporary lane closures required.

Equipment to be used includes excavators, saws, water carts to suppress dust, lighting and small tools.

We will make every effort to minimise the impact by using noise shields to dampen noise where possible, and ensuring equipment and vehicles are turned off when not in use.

Please keep to speed limits and follow the direction of traffic controllers and signs. For the latest traffic updates, contact 132 701, visit livetraffic.com or download the Live Traffic NSW App.

Contact

We are committed to minimising the impact of construction on the community and will continue to keep you informed as the project progresses. If you have any questions, or would like to sign up for our emailing list, please contact our delivery partner, Georgiou Group.
