

Mona Vale Road East - Out of hours work

Out of hours work is planned from **8pm to 6am** on the below dates, weather permitting.

If work is delayed due to wet weather, we will try and work a different night that same week. We will notify highly impacted residents if there is a change of date.

Work along the **eastern end of the project** will occur on:

- **Tuesday 6, Thursday 8 and Friday 9 October**
- **Tuesday 13, Thursday 15 and Friday 16 October**

Our work includes:

- laying new asphalt around the Mona Vale Road, Samuel Street and Ponderosa Parade roundabout
- ongoing road maintenance.

Work along the **western end of the project** will occur on:

- **Tuesday 6, Thursday 8 and Friday 9 October**
- **Monday 12, Tuesday 13, Thursday 15 and Friday 16 October**

Our work includes:

- removing rock from the top of the existing rock cuttings near the eastern end of Lane Cove Road, Walana Crescent and Laurel Road
- hauling material away from our work zones near the eastern end of Lane Cove Road, Walana Crescent and

Laurel Road to our stockpile at the Western Early Works site off Tumburra Street

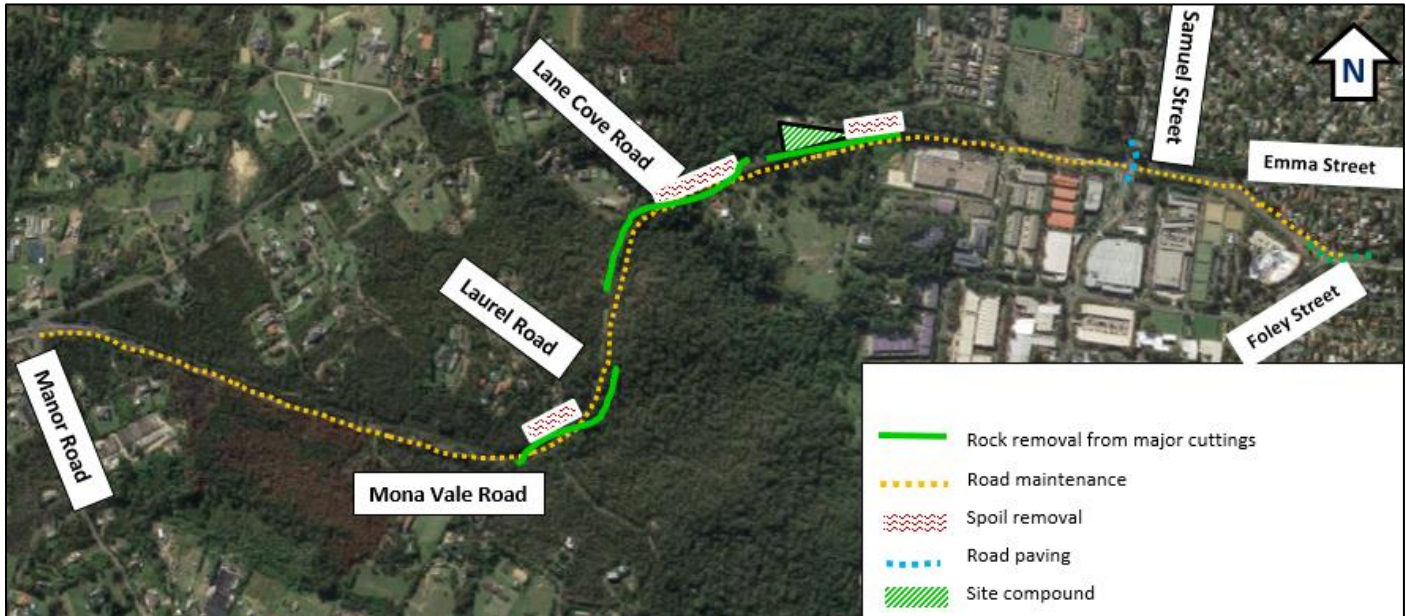

- ongoing road maintenance.

The Environment Protection Agency has approved a trial of increased night work, to four nights a week, over a six week period. This is necessary to remove the remaining rock along Mona Vale Road. The trial will begin on Monday 12 October. We will contact with highly and moderately impacted residents during the trial to seek your feedback and agreement for the four nights per week to continue beyond the six week trial

During our night work we will use excavators with rock hammers, large bulldozers, backhoes, tipper trucks, elevated work platforms, a roller, a paver, a profiler, street sweepers, vacuum trucks, light vehicles and lighting towers.

Visit our pop-up information stall at Pittwater Place on Friday 9 October from 10.30am to 1.30pm. We will be inside, near the main entrance from Park Street. This is an opportunity to ask questions and provide feedback in person.

Use of drone

A drone will be used to take progress photos and assist with survey work. The drone will stay within the project area.
