

Clearing work, asbestos removal and utilities relocation near the corner of Samuel Street and Mona Vale Road from 20 April

The NSW Government is investing \$140 million to upgrade Mona Vale Road between Manor Road, Ingleside, and Foley Street, Mona Vale, from two to four lanes to improve safety and traffic efficiency

Work is progressing on the eastern end of the Mona Vale Road East upgrade at the intersection of Samuel Street and Mona Vale Road. From **Monday 20 April to Friday 15 May**, weather permitting, we will:

- remove asbestos and clear some vegetation
- excavate and drill holes ready for new power poles
- install new power poles.

Asbestos removal and vegetation clearing

From **Monday 20 April** we will clear tree stumps and topsoil to make room for new power poles and the future stormwater detention basin between Samuel Street and Mona Vale Road (at the back of Jeanette Street).

Any identified asbestos contaminated material found during this work will be removed safely by accredited contractors so there is no risk to the public. The material will be disposed of at a licenced asbestos management facility. The area will be secured and signage in place to inform the community.

Some vegetation clearing may be required on the western corner of Samuel Street at Mona Vale Road. We have already notified nearby residents and will update them before this work begins.

Our working hours will be from **7am to 6pm, Monday to Friday** and from **8am to 1pm on Saturdays**.

Samuel Street lane closure for utilities relocation

From **Monday 20 April to Friday 15 May** we will work to relocate several power poles on Mona Vale Road and Samuel Street (within the work zone shown below). We will:

- drill holes for the new power poles
- install new poles.

Our working hours will be from **7am to 6pm, Monday to Friday** and from **8am to 1pm on Saturdays**.

A power outage is not required at this time however Ausgrid will notify you in the coming months about any planned power outages that are needed to reconnect the power lines.

To ensure the safety of workers, road users and pedestrians, we will close one lane of Samuel Street at various times during the work. We would greatly appreciate if residents along the southern end of Samuel Street can park their vehicles inside their properties while we carry out this work.

How will the work affect you?

The work will involve the use of machinery which will generate some noise and dust, including:

- excavators
- a crane
- chainsaws
- delivery trucks
- powered hand tools.

We will minimise noise where possible and ensure we turn off equipment and vehicles when not in use. We will monitor ground and weather conditions and wet areas down as required to keep dust to a minimum. A street sweeper will be utilised on Samuel Street where required. Traffic controllers will be on hand to ensure road users and pedestrians can move safely through the site.

Map of affected area

Note: Plan is not to scale and is for general information and illustrative purposes only

Pedestrians and bus passengers

The bus stops on Samuel Street will remain open throughout the work. Signs and traffic control will be in place to safely direct pedestrians.

Contact

We are committed to minimising the impact of construction on the community and will continue to keep you informed as the project progresses. If you have any questions, please contact our delivery partner, Georgiou Group.

Call: 1800 413 640 (during business hours)
