

MAY 2014

Mosman Bay Wharf Upgrade

Early morning and night work between 28 May and 30 June 2014

Work to upgrade the Mosman Bay Wharf as part of the NSW Government's \$770 million Transport Access Program started on 26 March 2014. Off-site work has been progressing well and on-site activity is expected to start on 21 May 2014.

Work to install ten steel piles for the new wharf is scheduled to start from 28 May 2014.

Installing piles requires some work to be carried out in very calm water conditions. If very calm conditions do not occur during the day, early morning and night work may be required when the wind is low and fewer boats travel in the Harbour.

Some of the work will be noisy, including drilling and hammering piles into rock. The hammering will be carried out intermittently, with multiple one minute periods of hammering.

Work will occur over a number of days with possible early morning and night work between 28 May and 30 June.

- If night work is required it will start around 11pm and finish by 7am
- If early morning work is required it will start at 5am.

To reduce the impact of noise on nearby residents, any noisy night work will be limited to two consecutive nights followed by a night of quiet or no work. There will be no night work on Saturday nights or prior to midnight on Sunday night.

We thank you for your patience during this work and apologise for any inconvenience.

Please do not hesitate to contact the wharf upgrade project team by calling 1800 770 973 or email WharfUpgradeProgram@rms.nsw.gov.au if you have any questions, feedback or would like more information about the project.

Yours faithfully

Petra Fowler
