The Nowra Bridge project will provide a new four lane bridge over the Shoalhaven River, upgraded intersections and additional lanes on the Princes Highway. Have your say on aspects of the detailed design, including the urban design and landscape plan by Sunday 16 August 2020.

Visit nswroads.work/NowraBridge to view the project animation and find out more.
The Nowra Bridge project will deliver safer and more reliable journeys for people, business and freight on the Princes Highway and within the Nowra Bomaderry area. As a result of community feedback, we have made minor design changes to improve safety, amenity and access.

**Your new bridge**

The new bridge will require 39 steel piles driven into the river bed. It will also have nine piers across the river to match the existing bridges. New double-T deck segments will be cast with concrete on the southern foreshore and incrementally launched across the river. The cross-section of the new four-lane bridge will be a similar shape to the current northbound bridge as the illustration above shows.

Following the project’s completion, the old southbound bridge will be re-purposed and the community will be consulted during this process.

Over 1.7 km of the Princes Highway will be upgraded to provide three lanes in each direction.

A new roundabout on Illaroo Road at the Fairway Drive intersection will improve safety and connectivity to and from the foreshore.

A new road will be built from the Princes Highway connecting to Lyrebird Drive.

The Pleasant Way and Princes Highway intersection will have a lane permitting left turn only into Pleasant Way.

The intersection at Scenic Drive and Bridge Road will be closed to improve pedestrian safety, connectivity and amenity.

A temporary rock platform will be built in the river to provide a working area for bridge piling in the southern half of the river. The temporary platform will be removed when the bridge is completed.
Urban design and landscape

The urban design and landscape plan shows how the new bridge connects with its wider environment. We have considered the existing natural landscape, Nowra’s future strategic river and CBD plans and the old Nowra Bridge.

Have your say

Please get in touch with us to have your say on the detailed design or the urban design and landscape plan. Visit nswroads.work/NowraBridge to view project information and use our online feedback form.

Community display centre

The community display centre at 14 Moss Street, Nowra, is open weekdays from 9am-5pm for the community to view project information and talk to the project team.

Online Q&A session

Join us on Facebook Live for an online Q&A session with the project team:

Thursday 6 August 2020, 12:30pm - 1pm

Follow NSW Roads for updates and event invites.

If you are unable to access Facebook please call the project team, or visit the project webpage where we will share the recorded session.

The new bridge will require 39 steel piles and nine bridge piers

Next steps

We will continue to keep the community informed as the project progresses.

This document contains important information about Transport projects in your area. If you require the services of an interpreter, please contact the Translating and Interpreting Service on 131 450 and ask them to call Transport Projects on 1800 331 713. The interpreter will then assist you with translation.
