

Oxley Highway upgrade

Rosewood – project update

Roads and Maritime Services | December 2018

Above: View of the new alignment looking west

Background

The NSW Government is funding a \$15 million upgrade of the Oxley Highway between Rosewood and Paddock roads, about five kilometres west of Wauchope, to improve safety and traffic flow. The project includes:

- Removing dangerous bends by realigning the road
- Widening the road shoulders
- Improving drainage
- Installing new safety barriers.

What has happened to date?

Since major work started this year, we have made significant progress, including:

- Completion of vegetation clearing
- Installing new drainage, including a new box culvert
- 90 per cent of earthwork is now complete.

Upcoming work

- Work to complete kerb and gutter, new road surface and sprayed seal, safety barriers, and line-marking are expected to begin in early 2019
- Painting a widened centreline for improved safety
- Move traffic onto the new lanes by mid-2019.

Traffic changes

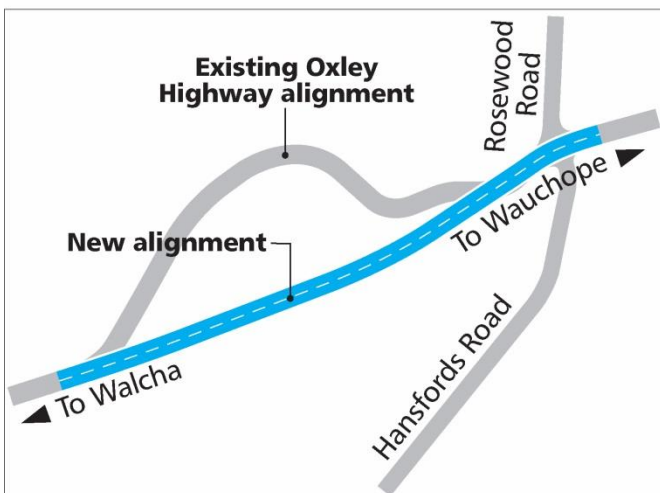

Intermittent traffic changes will be in place with delays of up to five minutes. More information will be made available before the changes take place.

We thank motorists for their continued patience during this work.
