

Intersection upgrade at Polo Flat Road and the Monaro Highway, Cooma

The NSW Government is finalising planning for a roundabout at the intersection of the Monaro Highway and Polo Flat Road to increase safety at this location.

Proposed design for the new roundabout

Polo Flat Road provides access to Cooma's industrial area and carries a high number of heavy vehicles. The proposed roundabout will deliver safer journeys for light and heavy vehicles sharing the road. A dedicated right turn lane for motorists turning into Yallakool Road will also be built as part of this upgrade.

In order to complete the roundabout before the busy winter period we are planning to start construction after the summer school holiday period in 2020.

How will the work affect you?

At this stage there is no impact to you or your property. The purpose of this letter is to keep you informed.

Construction is likely to take around four months to complete and there will be some changes to traffic conditions during this time.

We will continue to provide you with more information about the changes at the intersection and speak directly to residents and business owners nearby as planning progresses.
