

October 2017

Western Harbour Tunnel and Beaches Link - ground water monitoring well installation from Tuesday 10 October 2017

The NSW Government is funding preferred route investigations including geotechnical testing for the Western Harbour Tunnel and Beaches Link.

Roads and Maritime Services carries out geotechnical testing to gather information about underground rock, soil and groundwater conditions across a broad area. Data from this work will be used to inform the engineering design, final costings and a construction timeline.

A site identified by our geologists for groundwater monitoring is Bega Road, Northbridge.

A monitor check will take place on Tuesday 10 October 2017 (weather permitting), with monthly groundwater monitoring checks occurring for around twelve months. After monitoring is complete, the site will be restored to its previous condition.

The work will take place between **7am** and **6pm Monday to Friday** and between **8am** and **1pm on Saturday**. There will be no work at night, on Sundays or on public holidays.

How will the work affect you?

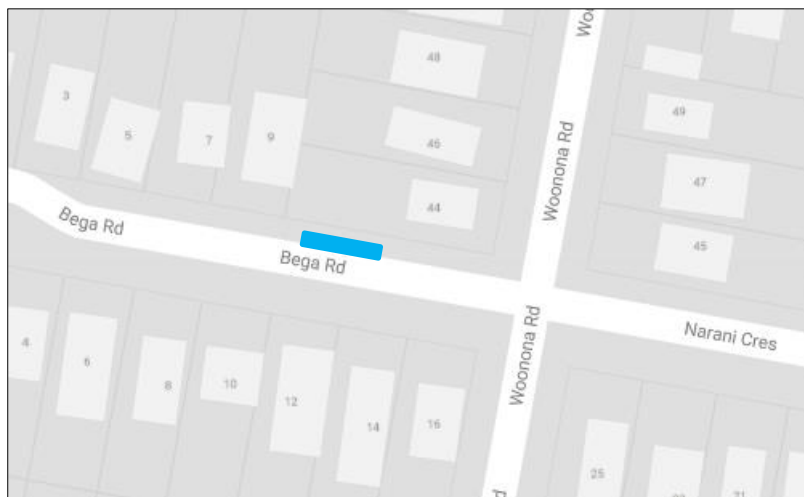

Appropriate site controls will be in place including traffic controls if required. If traffic controls are required, please observe all signage and follow instructions of traffic controllers.

The location of these tests does not indicate a possible alignment and the work is designed to gather data about groundwater conditions below ground. Thank you for your patience during this important work.

Contact

If you have any questions please contact our project team on 1800 789 297 during office hours (8.30am to 5pm Monday to Friday) or motorwaydevelopment@rms.nsw.gov.au.
