

Windang Bridge rehabilitation work

The NSW Government is carrying out essential rehabilitation work to improve safety for users of Windang Bridge

Roads and Maritime Services is continuing essential rehabilitation work on Windang Bridge to reduce pier scour and protect the bridge from erosion.

This project is expected to be completed in **November 2019**, weather permitting. This work is essential to keep the bridge and road safe and open to traffic in the long term.

Second rock stockpile, Judbooley Parade

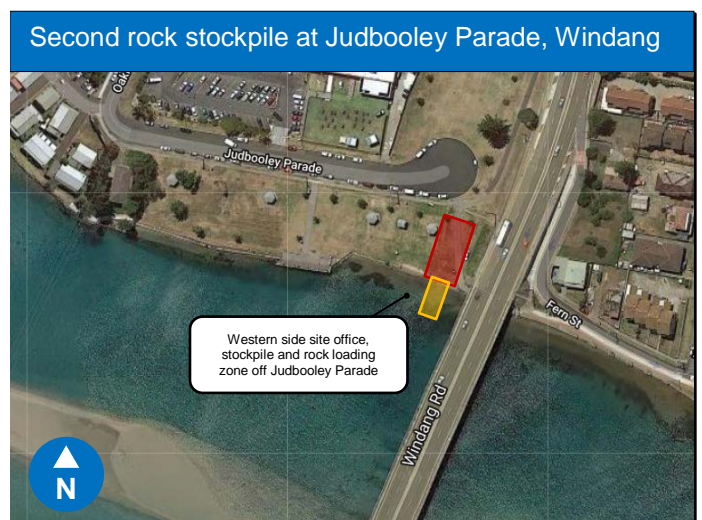

From 16 September a second rock stockpile will be established at the western side of the bridge, located on Judbooley Parade. This will allow rock placement to be carried out more efficiently, with two barges operating on the western side of the bridge.

One barge will be holding rock from the stockpile while a second barge will place rock using an excavator around bridge piers.

While this stockpile site is in operation, there will be some increased heavy vehicle activity on Oakland Avenue and Boronia Avenue and a short section of the shared path will be impacted.

A temporary shared path will be in place at the northern end of the bridge.

Pedestrians and cyclists are advised to keep to the new temporary shared path when walking around and under the bridge and should follow the direction of signage.

Rehabilitation work continues from Fern Street, Windang

Bridge rehabilitation continuing

Heavy vehicle activity will continue on Fern Street, Windang to carry out this essential work which involves the placement of rocks from a barge around the bridge piers.

A site office and rock stockpile has been established on the eastern side of Windang Bridge. The site office is located in the southern end of the carpark off Fern Street occupying around 14 car spaces.

Rock placement will be carried out between **7am** and **5pm** from **Monday** to **Friday** and **7am** to **1pm** on **Saturday**. No work will be carried out on Sundays and public holidays.

Bridge Monitoring

Inspection and monitoring work will continue through the project from the underside of Windang Bridge to help carry out rehabilitation work.

The southbound slow lane and shared footpath will be closed for work on Wednesdays until the end of the project between 7.30am and 3pm, weather permitting.

The northbound slow lane and shared footpath will be closed for work on Thursdays until the end of the project between 9.30am and 3pm, weather permitting.

One shared path will remain open at all times for pedestrians and cyclists during this work.

Motorists are advised of changed conditions and should allow an additional five minutes travel time and follow the directions of traffic control.
