

Graham Standen
Senior Project Manager
Windsor Bridge Replacement Project
Roads and Maritime Services
Locked Bag 928
North Sydney NSW 2059

Dear Mr Standen

Windsor Bridge Replacement Project (SSI-4951) – Maritime Archaeological Testing Report and Detailed Salvage Strategy for Maritime Archaeological Excavation - Condition B3

I refer to your correspondence seeking the Secretary's approval of the Maritime Archaeological Testing Report and Detailed Salvage Strategy for Maritime Archaeological Excavation (the report), Revision F, March 2018, under condition B3 of the project approval.

I note the land-based Archaeological Testing Report and Detailed Salvage Strategy was approved on 1 December 2017.

I have reviewed the above document and supporting information, and I am satisfied it adequately addresses the relevant requirements of condition B3 for the riverine component of the project.

Please ensure you gain the approved Heritage Manager's endorsement of the artefact retention policy referred to in Section 12.7 of the report (Revision F) and provide a copy to the Department and OEH for information, prior to the commencement of any riverine work.

Please ensure the environmental controls and strict heritage management measures set out in the report (Revision F) are implemented for all riverine heritage matters. You are also reminded to ensure all relevant conditions of approval are met and implemented prior to the commencement of any work.

I remind you that the results of the riverine archaeology work must be provided in the final heritage report under condition C5.

If you have any queries regarding this matter, please contact [REDACTED] or [REDACTED]

Yours sincerely

 23/3/18
Stacy Warren
Director Infrastructure Management
As Delegate of the Secretary
