Our ref: SSI-4951 C24

Dear Mr Standen

**Windsor Bridge Replacement Project (SSI-4951) – Water Quality Management Program – condition C24**

I refer to your correspondence of 13 June 2017 submitting the Water Quality Management Program (WQMP) (Final Revision 0), dated 4 June 2017 for the Secretary's approval, in accordance with condition C24 of SSI-4951.

The Department has carefully reviewed the WQMP, together with the comments from other agencies. I am satisfied that the updated document has responded to all issues raised and that it meets the requirements of condition C24. On this basis, I approve the WQMP and note the following matters will be addressed.

The Department of Primary Industries – Water (DPI – Water) supported the WQMP subject to all groundwater related data recorded throughout the project being made available to it. Please ensure you provide this data to DPI-Water, once available.

I also note that the WQMP will be updated with site specific trigger values for water quality once sufficient monitoring data has been collected. Please ensure that one month prior to operation of the project, you submit the updated WQMP to the Department and DPI – Water.

I also remind you of your commitment to refine the water quality management measures, including monitoring, within the Construction Environmental Management Plan, as required by conditions of approval D4 and D5.

If you have any queries regarding this matter, please contact  or 

Yours sincerely

Stacy Warren  
**Director Infrastructure Management**  
as Delegate of the Secretary
