

Woolwich Wharf Upgrade

DECEMBER 2019 COMMUNITY NOTIFICATION

Transport for NSW is improving Sydney's ferry services for customers. New and upgraded wharves are being delivered as part of the NSW Government's Transport Access Program - an initiative to deliver modern, safe and accessible transport infrastructure across the state.

In October and November 2019 the Review of Environmental Factors for the proposed upgrade to Woolwich Wharf was on display for comment. We received twenty-three written submissions relating to the proposal as well as in-person feedback at our community information session.

A Submissions Report has been prepared which summarises and responds to all of the feedback received. The Submissions Report can be viewed at rms.nsw.gov.au/projects/woolwich-wharf.

Most of the feedback we received related to the closure of Woolwich Wharf and alternative transport during construction. In response to this feedback, we have investigated and will temporarily relocate ferry services during construction. We have marked the location of the temporary wharf on the map below.

Whats next

In order for the temporary wharf to meet the requirements of Transport for NSW and our ferry operators, we need to carry out some work. This work would be completed before the closure of Woolwich Wharf to ensure no interruption to ferry services. We will provide further detail about this work before starting construction.

We will also provide a temporary bus route that will operate between Hunters Hill and Clarkes Point to service the temporary wharf. This bus service will be in addition to the existing bus services in the area.

The upgrade of Woolwich Wharf is expected to start by mid-2020 and take about five months to complete. We will notify the community before starting work.
